SUSTAINABLE DEVELOPMENT GOALS

**Conserve and sustainably
use the oceans, seas and
marine resources for
sustainable development**

THE MISSION

- Align efforts with SDG 14, "Life Below Water," to foster a balanced relationship between humanity and the sea for a sustainable future.
- Address key challenges such as marine pollution, overfishing, and the impacts of climate change.
- Ensure healthy oceans for current and future generations (if they survive).

FIN-tastic Evolution

- Scientists have discovered a fish mutation that enables a species to break down and recycle oceanic trash.
- The mutation allows the fish to digest microplastics and other pollutants, converting them into harmless compounds.
- This adaptation offers hope for addressing marine pollution by helping clean up the oceans naturally, in line with SDG 14.
- The long-term effects of the mutation are still being studied, but it shows potential in reducing environmental degradation, thereby

"MEAT" THE FISH

- **CODENAME:**

- Bass Stallion

- **ABILITIES:**

- Non stop flopping;
- Trash Gobbler
- RPGR - Rocket Propelled Gag Reflex

FISHING FOR \$\$\$

- Revenge has never been so clean;
- Full-scale Fish fury action;
- You will be Hooked from the first to the last puke;
- Humans are overrated!

LET'S PLAY
